Energy Product Catalog 2014
Covidien Energy-based Devices (EbD), the world leader in radiofrequency (RF) energy-based systems, is committed to providing you with a complete line of products that contribute to the safest possible surgical environment.

EbD manufactures a full range of RF energy products — electrosurgical and tissue fusion generators, pencils, patient return electrodes, ablation systems and an entire line of accessories. Our fully integrated systems set the industry standard in patient care and purchasing efficiency.

Generators

TissueFect™ Sensing Technology
TissueFect™ sensing technology is a control system designed to precisely manage energy delivery creating a range of options for desired tissue effect. The ForceTriad™ energy platform provides the surgeon with consistent power delivery in all monopolar and bipolar modes.

Valleylab™ Exchange Software Update System
The Valleylab™ Exchange Software Update System is an innovative service that allows remote updates to the software in the ForceTriad™ energy platform, without shipping the energy platform to a service facility. This service will enable customers to benefit from current software updates as soon as they are available, with minimal downtime, and is the first remote-access update service in the electrosurgery field.

Valleylab™ Mode
A new waveform, Valleylab™ mode provides a unique combination of monopolar hemostasis and dissection while using a lower power setting resulting in less char, less thermal spread and less arcing than a traditional Coagulation mode.

Power Efficiency Rating (PER)
Measure of the ability of an electrosurgical generator to accurately deliver the selected power into a wide range of impedances.

Adaptive REM™ System
Adaptive REM™ combines the feedback circuitry of hardware monitoring with an advanced software-controlled adaptation feature. The adaptive system still maintains the 5-135 ohms limits, but also creates a window of acceptable impedances based on contact conditions of the individual patient.

All generators are designed to meet applicable international standards. Replacement User's Guides and Service Manuals are available for all models (see page 55). All generators include a power cord. All other accessories are sold separately.

I Bipolar resection

The Bipolar Resection Activation Kit enables activation of the bipolar-resection application on a single ForceTriad™ energy platform with software version 3.30 or greater.

The application is intended for use in the following procedures in a saline environment: Transurethral Resection of the Prostate (TURP), Transurethral Resection of the Bladder (TURB) and hysteroscopic resection.

**FTBRKIT 1 each**

**Activation Kit Bipolar Resection for the ForceTriad™ energy platform**

- Telephone and email contact information for EbD Technical support – to be contacted for activation of this Software application
- RS232 Cable for connecting the ForceTriad™ energy platform to the biomed PC (for Valleylab™ Exchange)
- License Key Code to be provided to tech support
- CD-Rom with user guides
- Three labels to be applied to the ForceTriad™ energy platform after activation of the software application

**FT0021S 1 each**

**Bipolar Resection Cord Storz™**

- To be used with Storz™ bipolar Resectoscopes
- To be used with the ForceTriad™ energy platform
- Reusable
- 4,6 m Cord

**FT0022W 1 each**

**Bipolar Resection Cord Wolf**

- To be used with Wolf bipolar Resectoscopes
- To be used with the ForceTriad™ energy platform
- Reusable
- 4,6 m Cord
The Remote Control Application

The Remote Control Application is add-on software that enables communication between a ForceTriad™ energy platform and a third-party remote-control system. Once the application has been activated, an energy platform can be integrated into a system of multiple hardware components operated from a central location. Remote-control systems are used in integrated operating rooms to control medical devices and various audio, video, and communication devices from a central communication console.

This application needs Software Version 3.4 or higher.
Generators and Monitor

**Force FX™-C Electrosurgical Generator**
- Designed for the most demanding monopolar and bipolar procedures.
- Instant Response™ technology
- Adaptive REM™ system
- Isolated output
- Bipolar current monitor (VLCM) compatible
- Interlink cable required for use with RapidVac™ or OptiMumm™ smoke evacuation systems — must be ordered separately
- PER of 98 in cut

**SurgiStat™ II Electrosurgical Generator**
- Designed for light-duty office-based monopolar and bipolar procedures.
- Conventional electrosurgery technology
- Return electrode contact quality monitoring (RECQM) system
- Isolated output
- PER of 86 in cut

**Instant Response™ Technology**
This smart generator technology features an advanced feedback system that senses changes in tissue impedance and adjusts output accordingly. The result is:
- Less thermal damage to surrounding tissue
- More consistent surgical performance
- Ability to use lower power settings
- Less electrode drag
- Less capacitive coupling

**FORCEFX8CS & FORCEFX8CAS**
1 each

**FORCEFX8CS & FORCEFX8CAS**
For use with Force FX™ series or LigaSure™ generators.

**VLCM**
1 each

**VLCM**
For use with Force FX™ series or LigaSure™ generators.

Coated Electrode Technology...

Coated electrodes provide a wide range of benefits to the surgeon, including improved surgical performance and easier cleaning as compared to traditional stainless steel electrodes. There are several types of coated electrodes, all of which perform differently during surgical procedures.

EDGE™ coated electrodes are manufactured using high-quality surgical steel and a durable, proprietary, elastomeric polymer coating. EDGE™ electrodes provide a more consistent surgical effect with lower power settings.

Uncompromised cut performance

Throughout a variety of procedures, no matter what type of tissue. The EDGE™ electrodes provide cut performance like stainless steel – but with a clean advantage.

Easy to Clean

saves you time. With Valleylab’s proprietary coating, no scraping is required. Just wipe clean with a wet sponge and continue.

Durable and Bendable

without compromising the integrity of the coating. EDGE™ coated electrodes are bendable up to 90 degrees without the coating degradation or flaking that can occur with PTFE electrodes.

Improved Safety

with the NEW Safety Sleeve™ insulated electrodes. These electrodes provide an increased level of safety especially in procedures when the pencil tip can come in contact with unintended target tissue. There is no need to insulate these electrodes with rubber catheters or electrode tip protectors.

Choice of Styles

EDGE™ coated electrodes are available in a wide variety of styles, including blades, needles, three electrode lengths, and insulated electrodes for increased safety when used in close proximity to non-targeted tissue.

EDG™ electrodes can be purchased in your favorite Energy based Devices button or rocker switch pencil for greater convenience and cost savings.

Smoke Evacuation Products
RapidVac™ Smoke Evacuation System and Accessories

**RapidVac™ Smoke Evacuator**
Requires SEA3700 RapidVac™ smoke evacuator filter.
*For use with any electrosurgical generator.*
- Evacuates electrosurgical smoke and laser plume
- Synchronizes with electrosurgical units for auto activation using SEA3730 or SEA3740
- Five power levels plus turbo mode
- Maximum flow rate of 44 cfm
- Needs no prefilters or adapters

**RapidVac™ Interlink Cable**
Synchronizes RapidVac™ system to ForceTriad™, Force FX™ series and Force EZ-C™ electrosurgical generators.
- 3 m (10 ft) cable

**RapidVac™ Remote Switch Activator**
Synchronizes RapidVac™ system to any generator using audio sensing of its activation tones.
- 3 m (10 ft) cable

**RapidVac™ Smoke Evacuator Filter**
- Four-stage, ULPA filter technology
- Three convenient ports, no adapters needed
  - Port size: 6 mm (1/4 in.)
  - 10 mm (3/8 in.)
  - 22 mm (7/8 in.)
- No prefiltier needed
- 25 hours of activation time; approximately three to five months actual use

**RapidVac™ Smoke Evacuator Foot Switch**
*For use with RapidVac™ smoke evacuator*
- 4.6 m (15 ft) cord
Smoke Evacuation Products, Sterile, Single Use
RapidVac™ Tubing

SEA3705 10 units/case
Tubing, 1/4” x 10’
- Connects directly to RapidVac™ smoke evacuator
- Lap tubing/no valve

SEA3720 12 units/case
Laparoscopic Tubing, 1/4” x 10’
- Connects directly to RapidVac™ smoke evacuator
- In-line valve enables controlled smoke evacuation with minimal pneumoperitoneal pressure loss

SEA3710 10 units/case
Tubing, 3/8” x 10’
- Connects directly to RapidVac™ smoke evacuator
- Interfaces with AccuVac™ pencil

SEA3725 10 units/case
Wand
Compatible with E3635 and SEA3715 7/8” tubing.
- For evacuation of laser plume; laser resistant
- 2.2 cm (7/8 in.) diameter
- 20 cm (8 in.) length

SEA3715 10 units/case
Tubing with Sponge Guard, 7/8” x 10’
- Connects directly to RapidVac™ smoke evacuator
